Workaround:

Description
David has run into trouble using spider coran clustering after running xmipp and Imagic alignments.

His project is 12Feb04b. He is using less than the max 99,999 particles.

This issue is more than 1 year old.
I didn't experience any issue recently so I think we can close it.

#4 - 07/10/2013 03:38 PM - Amber Herold
- Status changed from Assigned to Closed

#5 - 10/12/2016 06:27 PM - Anchi Cheng
- Status changed from Closed to Won't Fix or Won't Do

It has been noted consistently above 50,000 particles but we don't know why. Put a limit in myamiweb to prevent naive user to try it.
