Description
Add links to redmine wiki help pages to appion pages. That way, the documentation is accessible to users when they need it.

- Target version changed from Appion/Leginon 2.2.0 to Appion/Leginon Future Version

#4 - 09/07/2012 12:35 PM - Amber Herold
- Category set to Web interface
- Status changed from New to In Code Review
- Assignee set to Anchi Cheng
- Target version changed from Appion/Leginon Future Version to Appion/Leginon 3.0.0

I added a link in the processing header to [User Guide] on the upper right side. This will default to the main processing help index page. This can also be context specific if another URL is passed to the processing_header() function from individual processing pages. I've updated template, dog, and manual picking to go directly to their specific help pages. More to come, but wanted to see if anyone had thoughts on the implementation prior to making the change to all the processing pages.

#5 - 01/24/2018 04:37 PM - Anchi Cheng
- Status changed from In Code Review to Closed

general link still works. specific link doesn't.
